

Why does your business need Secure Care?

Your business has already invested in tools or services to uncover potential security vulnerabilities in your IT environment. Now that these vulnerabilities have been identified, who will remediate these issues to keep your business safe?

Why Winxnet?

With Winxnet's Secure Care solution, organizations can affordably and efficiently handle most vulnerabilities in Windows-based environments, without adding additional stress to IT or operational staff. This solution is the perfect fit for organizations in need of security remediation support so resources can stay focused on business productivity and performance.

What's Included?

- Windows-based automated patching for servers and workstations
- Monthly Active Directory Health Report
- Limited 3rd Party Patching
- Discounted rates for remediation requiring manual intervention

EXCELLENCE IN IT DELIVERY

Technology is critical to operating a business. The use of technology enables businesses to grow faster and operate more profitably. Because of constrained budgets and challenges in accessing IT talent, small and mid-sized organizations often think they must settle for something less than great. Enter Winxnet—we bring IT excellence to organizations of all sizes.

Winxnet Transforms the Delivery of IT with:

Expertise - A lot goes into an IT environment. Winxnet provides the right people to keep your environment productive and efficient.

Access & Availability - You can't schedule an emergency. We have guaranteed response times that work for the needs of your business.

Security - The security landscape is constantly changing. We have the team and experts to help with all of your security needs.
